Who We Are

We are a public utility holding company whose principal business is the local distribution of electricity and natural gas throughout our service areas in the states of New Hampshire, Massachusetts and Maine. We are subject to comprehensive regulation by federal and state utility regulatory authorities. We are the parent company of three distribution utilities:

- (i) Unitol Energy Systems, Inc., which provides electric service in the southeastern seacoast and state capital regions of New Hampshire, including the capital city of Concord, New Hampshire;
- (ii) Fitchburg Gas and Electric Light Company, which provides both electric and natural gas service in the greater Fitchburg area of north central Massachusetts; and
- (iii) Northern Utilities, Inc., which provides natural gas service in southeastern New Hampshire, and portions of southern and central Maine, including the city of Portland, which is the largest city in northern New England.

Together, our distribution utilities serve approximately 101,400 electric customers and 71,900 natural gas customers in their service areas.

In addition, we are the parent company of Granite State Gas Transmission, Inc., an interstate natural gas transmission pipeline company that provides interstate natural gas pipeline access and transportation services to Northern Utilities, Inc. and third party gas marketers in New Hampshire and Maine.

We do not own or operate electric generating facilities, and we recover the approved cost of purchased electricity and natural gas from our customers in rates on a fully reconciling basis. As a result of this reconciling rate structure, our regulated utility earnings are not affected by changes in the cost of purchased electricity and natural gas. Rather, our regulated utility earnings are primarily derived from the return on investment we earn on our utility assets, which are dedicated to the delivery (i.e., distribution and transmission) of electricity and natural gas to customers. Substantially all of our revenue and earnings are derived from our regulated utility operations.

Our non-regulated operations are conducted through Usource L.L.C. (“Usource”). Usource provides energy brokering and advisory services to large commercial and industrial customers primarily in the Northeastern United States. As an energy broker and advisor, Usource helps business clients manage and reduce electricity and natural gas costs using a proprietary energy trading platform. Usource does not take title to the energy but solicits energy bids from qualified competitive energy suppliers on behalf of its clients. Usource’s fees for its services are paid by the transacting supplier, typically over the term of the energy contract.

Our total operating revenue was \$352.8 million for the twelve months ended December 31, 2011 and \$114.2 million for the three months ended March 31, 2012. Earnings applicable to common shareholders for the twelve months ended December 31, 2011 were \$16.3 million and for the three months ended March 31, 2012 were \$9.0 million. We had total assets of \$783.2 million at March 31, 2012, including an investment in net utility plant of \$512.2 million.

Business Strategy

Our principal business is the local distribution of electricity and natural gas throughout our service areas in New England. Our mission is to provide Energy for Life—safely, reliably, cost-effectively and responsibly—to a growing number of customers with a high-performing workforce. To achieve this mission, we rely on four principal strategies:

Customer Service. We strive to provide exceptional customer service by strengthening our interaction and communication with our customers. We invest in information technology systems and employee training to enhance our customers' experience of doing business with us. We also seek to uphold our public image among our customers and other key constituents by proactively committing to be a business in good standing in the communities we serve.

Operations. We are committed to providing safe and reliable delivery of natural gas and electricity to our customers and to ensuring that plans, procedures and alternatives are in place to respond to and recover from natural disasters and unintended business disruptions. We seek to optimize our operational performance and investment strategy to achieve desired service levels for our customers while minimizing the life-cycle cost of utility assets and achieving a fair return on investment.

Regulation. We manage the complex and evolving regulatory environment with the goal of achieving authorized returns on a growing level of utility investments and the full recovery of our cost to serve. We also seek to maintain strong working relationships with our regulators and stay actively engaged in policy formation and the regulatory processes.

Growth. We seek to continue to expand our distribution business by adding new customers and making investments in our electric and natural gas delivery systems. We strive to maximize opportunities for the growth of our existing utility operations and plan to continue to consider strategic acquisitions to complement our organic growth. We also strive to grow our non-regulated business, Usource, by continuing to increase brokering and advisory services to new and existing customers.

Our Key Strengths

We believe our key strengths have enabled us to successfully meet our obligations to customers, grow our business profitably and create shareholder value. These strengths include:

Regulated Local Distribution Utility Business Model. Our principal business is the local distribution of electricity and natural gas to residential and commercial and industrial customers throughout our service areas. Our earnings are principally derived from the rate-of-return on our distribution utility rate base and regulatory assets. In the last twelve months, we completed base rate case proceedings across all of our utility operating companies. Collectively, the results of these rate cases represented an approximate \$32 million, or 30%, initial increase to our annual base revenues. In addition to the initial base rate relief, we also have put in place some decoupling mechanisms and some longer term capital cost recovery trackers providing annual rate step adjustments to earn a rate-of-return on future additions to utility rate base without

the need to file full rate cases. We also plan to make additional equity capital contributions in our utility companies to finance a growing level of utility rate base upon which we earn a rate-of-return.

Growing Service Areas and Customer Base. Our operations are located in the southeastern seacoast and state capital regions of New Hampshire, the greater Fitchburg area of north central Massachusetts, and portions of southern and central Maine, including the city of Portland, which is the largest city in northern New England. These service areas provide a diverse and growing customer base. In 2011, we achieved growth in natural gas sales by connecting new residential and commercial and industrial customers to our system and converting existing customers from alternate fuels (such as propane and heating oil) to natural gas. We added several large energy users, including healthcare, educational and manufacturing facilities located throughout our service areas. On a weather-normalized basis, total therm sales of natural gas increased 7% in 2011 compared to 2010. The increase in gas therm sales reflects new customer additions across residential and commercial and industrial customer groups during 2011.

Diversified Natural Gas and Electric Sales. In 2011, our sales margin was split about evenly between electricity and natural gas sales margins. Our customers are a diversified mix of residential and commercial and industrial customers, with no single customer representing more than 5% of our total sales. In 2011, 48% of our total utility operating revenue was from residential customers, while 52% was from commercial and industrial customers. Our sales to our largest commercial and industrial customers are not concentrated in one industry segment but vary from government facilities to large retail outlets, colleges and hospitals and a broad range of industrial companies that reflect the diverse nature of the communities that we serve.

Historic Dividend Stability. Since our incorporation in 1984, we have continuously paid quarterly dividends and we have never reduced our dividend rate, while still increasing our investment in our utility rate base. We expect to maintain our current dividend policy while providing for future growth of earnings available to shareholders.

Experienced Management Team. Our senior management team is highly experienced in the utility industry. Our Chairman and Chief Executive Officer, Robert Schoenberger, has 34 years of industry experience. In addition, our senior management team as a whole averages approximately 24 years of experience in the industry and 17 years of experience with us.

Summary Historical Consolidated Financial Information

The following table contains summary historical consolidated financial information, including per share information, for each of the periods, or as of the dates, indicated.

The summary historical consolidated financial information should be read in conjunction with our audited financial statements and the related notes, our unaudited interim financial statements and the related notes and the section entitled *Management's Discussion and Analysis of Financial Condition and Results of Operations* in our Form 10-K for the year ended December 31, 2011 and our Form 10-Q for the quarter ended March 31, 2012, which are incorporated by reference into this prospectus supplement. See the section entitled *Where You Can Find More Information* in this prospectus supplement. Our financial results for the three months ended March 31, 2012 are not necessarily indicative of the results that may be expected for an entire year.

Sales of natural gas and the related results of operations can be significantly affected by seasonal weather conditions. Annual revenues are substantially realized during the heating season as a result of higher sales of natural gas due to cold weather. Accordingly, our operating results historically are most favorable in the first and fourth calendar quarters. Fluctuations in seasonal weather conditions between years may have a significant effect on our results of operations and cash flows.

Sales of electricity are generally less sensitive to weather than natural gas sales, but may also be affected by weather conditions in both the winter and summer seasons.

The summary historical consolidated financial information as of December 31, 2011 and 2010, and for each of the two years in the period ended December 31, 2011, was derived from our consolidated financial statements as filed with the SEC in our Annual Report on Form 10-K for the year ended December 31, 2011, which statements, as of such dates and for such periods, were audited by McGladrey & Pullen, LLP and which statements are incorporated by reference in this prospectus supplement. See the section entitled *Where You Can Find More Information* in this prospectus supplement.

The summary historical consolidated financial information for the period ended December 31, 2009 was derived from our consolidated financial statements as filed with the SEC in our Annual Report on Form 10-K for the year ended December 31, 2011, which statements for such period were audited by Caturano and Company, P.C. (whose name has since been changed to Caturano & Company, Inc.) and which statements are incorporated by reference in this prospectus supplement. See the section entitled *Where You Can Find More Information* in this prospectus supplement.

Effective July 20, 2010, McGladrey & Pullen, LLP acquired certain assets of Caturano and Company, Inc., and substantially all of the officers and employees of Caturano and Company, Inc. joined McGladrey & Pullen, LLP.

The summary historical consolidated financial information as of and for the three months ended March 31, 2012 and 2011 was derived from our unaudited consolidated financial statements as filed with the SEC in our Quarterly Report on Form 10-Q for the quarter ended March 31, 2012, which statements are incorporated by reference in this prospectus supplement. See the section entitled *Where You Can Find More Information* in this prospectus supplement.

RISK FACTORS

Before making an investment in shares of our common stock, you should carefully consider the risks described below and the information included or incorporated by reference in this prospectus supplement and the accompanying prospectus. We have identified a number of these risks in (i) our Annual Report on Form 10-K for the year ended December 31, 2011 (including in the section entitled *Risk Factors* in Part I, Item 1A therein) and (ii) our Quarterly Report on Form 10-Q for the quarter ended March 31, 2012, each of which is incorporated by reference into this prospectus supplement. See the section entitled *Where You Can Find More Information* in this prospectus supplement. In addition, you should carefully consider the risks and uncertainties listed under the section entitled *Cautionary Statement about Forward-Looking Statements* in this prospectus supplement.

Risks Relating to Our Business

For a description of risks relating to our business, please see our Annual Report on Form 10-K for the year ended December 31, 2011 and our Quarterly Report on Form 10-Q for the quarter ended March 31, 2012, each of which is incorporated by reference into this prospectus supplement.

Risks Relating to this Offering

Our stock price may decline when our results decline or when events occur that are adverse to us or our industry. You can expect the market price of our common stock to decline when our results decline or at any time when events actually or potentially adverse to us or the natural gas and electric industry occur. Our common stock price may decline to a price below the price you paid to purchase your shares of common stock in this offering.

Substantial sales of our common stock could cause our stock price to decline. If we or our existing shareholders sell a large number of shares of our common stock or the public market perceives that we or our existing shareholders might sell shares of our common stock, the market price of our common stock could significantly decline. All of the shares offered by this prospectus supplement will be freely tradable without restriction or further registration under the federal securities laws unless purchased by an “affiliate,” as that term is defined in Rule 144 under the Securities Act of 1933, as amended (the “Securities Act”). The outstanding shares subject to lock-up agreements between each of our directors and our executive officers and the underwriters may be sold 90 days after the date of this prospectus supplement, except as noted in the section entitled *Underwriting* in this prospectus supplement. Significant shareholders who are neither directors nor executive officers are not subject to lock-up agreements.

The proposed sale and issuance of common stock will reduce the proportionate share of the holdings of our current shareholders. As of May 4, 2012, we had 10,990,764 shares of common stock outstanding. If the proposed sale and issuance of common stock is consummated, we will have approximately 13,290,764 shares of common stock outstanding (13,635,764 shares if the underwriters exercise their over-allotment option in full). As a result, our shareholders’ proportionate holding in us would be reduced by approximately 17.3% (19.4% if the underwriters exercise their over-allotment option in full).

CAUTIONARY STATEMENT ABOUT FORWARD-LOOKING STATEMENTS

This prospectus supplement and the documents we incorporate by reference herein contain statements that constitute “forward-looking statements” within the meaning of Section 27A of the Securities Act, Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included or incorporated by reference herein, including, without limitation, statements regarding the financial position, business strategy and other plans and objectives for our future operations, are forward-looking statements.

These statements include declarations regarding our or our management’s beliefs and current expectations. In some cases, you can identify forward-looking statements by terminology such as “may,” “will,” “should,” “expects,” “plans,” “anticipates,” “believes,” “estimates,” “predicts,” “potential” or “continue” or the negative of such terms or other comparable terminology. These forward-looking statements are subject to inherent risks and uncertainties in predicting future results and conditions that could cause the actual results to differ materially from those projected in these forward-looking statements. Some, but not all, of the risks and uncertainties include those described in the section entitled Risk Factors in this prospectus supplement and the following:

- our regulatory environment (including regulations relating to climate change, greenhouse gas emissions and other environmental matters), which could affect the rates we are able to charge, our authorized rate of return, our cost of service and our ability to recover costs in our rates;
- fluctuations in the supply of, demand for, and the prices of energy commodities and transmission capacity and our ability to recover energy commodity costs in our rates;
- customers’ preferred energy sources;
- severe storms and our ability to recover storm costs in our rates;
- our stranded electric generation and generation-related supply costs and our ability to recover stranded costs in our rates;
- declines in the valuation of capital markets, which could require us to make substantial cash contributions to cover our pension obligations, and our ability to recover pension obligation costs in our rates;
- general economic conditions, which could adversely affect (i) our customers and, consequently, the demand for our distribution services, (ii) the availability of credit and liquidity resources and (iii) certain of our counterparty’s obligations (including those of our insurers and lenders);
- our ability to obtain debt or equity financing on acceptable terms;
- increases in interest rates, which could increase our interest expense;
- restrictive covenants contained in the terms of our and our subsidiaries’ indebtedness, which restrict certain aspects of our business operations;
- variations in weather, which could decrease demand for our distribution services;
- long-term global climate change, which could adversely affect customer demand or cause extreme weather events that could disrupt our electric and natural gas distribution services;
- numerous hazards and operating risks relating to our electric and natural gas distribution activities, which could result in accidents and other operating risks and costs;

Table of Contents

- catastrophic events;
- our ability to retain our existing customers and attract new customers;
- our energy brokering customers' performance and energy used under multi-year energy brokering contracts; and
- increased competition.

Many of these risks are beyond our control. You should assume that the information appearing in this prospectus supplement and the documents incorporated by reference herein is accurate only as of their respective dates. We undertake no obligation to update any forward-looking statements to reflect events or circumstances after the date on which such statements are made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for us to predict all of these factors, nor can we assess the impact of any such factor on our business or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statements.

If the underwriters exercise their over-allotment option in full, we will receive approximately \$8.6 million of additional proceeds, based on the assumed public offering price.

We intend to use the net proceeds from this offering (including the proceeds from any exercise by the underwriters of their over-allotment option) to make equity capital contributions to our regulated utility subsidiaries, to repay short-term debt and for general corporate purposes.

UNDERWRITING

Under the terms and subject to the conditions contained in an underwriting agreement dated _____, 2012, we have agreed to sell to the underwriters named below, for whom RBC Capital Markets, LLC is acting as representative (the "Representative"), the following respective numbers of shares of common stock:

Underwriter	Number of Shares
RBC Capital Markets, LLC	
Robert W. Baird & Co. Incorporated	
Janney Montgomery Scott LLC	
Brean Murray, Carret & Co., LLC	
Total	2,300,000

The underwriting agreement provides that the underwriters are obligated to purchase all the shares of common stock in the offering if any are purchased, other than those shares covered by the over-allotment option described below. The underwriting agreement also provides that if an underwriter defaults, the purchase commitments of non-defaulting underwriters may be increased or the offering may be terminated.

Option to Purchase Additional Common Units

We have granted to the underwriters a 30-day option to purchase on a pro rata basis up to 345,000 additional shares at the offering price less the underwriting discounts. The option may be exercised only to cover any over-allotments of common stock.

Underwriting Discounts and Expenses

The underwriters propose to offer the shares of common stock directly to the public at the offering price on the cover page of this prospectus supplement and to selling group members at that price less a selling concession of \$ _____ per share. After the offering, the Representative may change the offering price and concession and discount to broker/dealers. The underwriters and selling group members may allow a discount of \$ _____ per share on sales to other broker/dealers. All compensation received by the underwriters in connection with this offering will not exceed 8% of the gross offering proceeds.

The following table summarizes the compensation we will pay:

	No Exercise	Full Exercise
Per Unit	\$	\$
Total	\$	\$

The expenses of the offering that are payable by us are estimated to be \$544,460 (exclusive of underwriting discounts).

Lock-Up Agreements

We have agreed that we will not offer, sell, sell short, contract to sell, pledge or otherwise dispose of, directly or indirectly, or file with the SEC a registration statement or amendment to a registration statement under the Securities Act relating to, any shares of our common stock or securities convertible into or exchangeable or exercisable for any shares of our common stock, or publicly disclose the intention to make any such offer, sale, pledge, disposition or filing, without the prior written consent of the Representative for a period of 90 days after the date of this prospectus supplement, except (i) issuances pursuant to the

[Table of Contents](#)

exercise of options outstanding on the date hereof, (ii) grants of stock options and restricted stock and other securities issuances pursuant to the terms of a plan in effect on the date hereof, (iii) issuances pursuant to the exercise of such options, (iv) issuances pursuant to our 401(k) plan, (v) the filing of registration statements on Form S-8 and amendments thereto in connection with those securities and plans, (vi) grants of common stock as employee length of service awards, (vii) grants of common stock or restricted stock units to members of our Board of Directors as a portion of their compensation for service on the Board of Directors, and (viii) issuances pursuant to dividend reinvestment plans and the filing of registration statements and amendments related thereto in connection with the sale and issuance of securities under such plans.

Our executive officers and directors have agreed that they will not offer, sell, sell short, contract to sell, pledge or otherwise dispose of, directly or indirectly, any shares of our common stock or securities convertible into or exchangeable or exercisable for any shares of our common stock, enter into a transaction that would have the same effect, or enter into any swap, hedge or other arrangement that transfers, in whole or in part, any of the economic consequences of ownership of our common stock, whether any of these transactions are to be settled by delivery of our common stock or other securities, in cash or otherwise, or publicly disclose the intention to make any such offer, sale, pledge or disposition, or to enter into any such transaction, swap, hedge or other arrangement, without, in each case, the prior written consent of the Representative for a period of 90 days after the date of this prospectus supplement, provided, however, that the foregoing shall not apply to any transfer that is a bona fide gift or any transfer to a trust for the benefit of the officer or director or an immediate family member, provided the transferee agrees to be bound in writing by the terms of the agreement.

The 90-day restricted period described in the preceding paragraphs will be automatically extended if: (i) during the last 17 days of the 90-day restricted period we issue an earnings release or announce material news or a material event; or (ii) prior to the expiration of the 90-day restricted period, we announce that we will release earnings results during the 15-day period following the last day of the 90-day period, in which case the restrictions described in the preceding paragraph will continue to apply until the expiration of the 18-day period beginning on the issuance of the earnings release or the announcement of the material news or material event.

Price Stabilization, Short Positions and Penalty Bids

In connection with the offering, the Representative, on behalf of the underwriters, may purchase and sell shares of common stock in the open market. These transactions may include short sales, syndicate covering transactions and stabilizing transactions. Short sales involve syndicate sales of shares of common stock in excess of the number of shares to be purchased by the underwriters in the offering, which creates a syndicate short position. “Covered” short sales are sales of shares of common stock made in an amount up to the number of shares represented by the underwriters’ option to purchase additional shares. In determining the source of shares to close out the covered syndicate short position, the underwriters will consider, among other things, the price of common stock available for purchase in the open market as compared to the price at which they may purchase shares through the option to purchase additional shares. Transactions to close out the covered syndicate short position involve either purchases of common stock in the open market after the distribution has been completed or the exercise of the option to purchase additional shares. The underwriters may also make “naked” short sales of common stock in excess of the option to purchase additional shares. The underwriters must close out any naked short position by purchasing common stock in the open market. A naked short position is more likely to be created if the

[Table of Contents](#)

underwriters are concerned that there may be downward pressure on the price of the common stock in the open market after pricing that could adversely affect investors who purchase in the offering. Stabilizing transactions consist of bids for or purchases of common stock in the open market while the offering is in progress.

The underwriters also may impose a penalty bid. Penalty bids permit the underwriters to reclaim a selling concession from a syndicate member when the Representative repurchases shares of common stock originally sold by that syndicate member in order to cover syndicate short positions or make stabilizing purchases.

Any of these activities may have the effect of preventing or retarding a decline in the market price of the common stock. They may also cause the price of our common stock to be higher than the price that would otherwise exist in the open market in the absence of these transactions. These transactions may be effected on the New York Stock Exchange or otherwise and, if commenced, may be discontinued at any time.

Conflicts of Interest

In the ordinary course of business, certain of the underwriters and their affiliates have provided and may in the future provide financial advisory, investment banking and general financing and banking services for us and our affiliates for customary fees.

We intend to use the net proceeds from this offering (including the proceeds from any exercise by the underwriters of their over-allotment option) to make equity capital contributions to our regulated utility subsidiaries, to repay short-term debt and for general corporate purposes.

Electronic Distribution

This prospectus supplement and the accompanying prospectus in electronic format may be made available on the websites maintained by one or more of the underwriters. The underwriters may agree to allocate a number of shares for sale to their online brokerage account holders. The shares will be allocated to underwriters that may make internet distributions on the same basis as other allocations. In addition, shares may be sold by the underwriters to securities dealers who resell shares to online brokerage account holders.

Other than this prospectus supplement and the accompanying prospectus in electronic format, information contained in any website maintained by an underwriter is not part of this prospectus supplement or the accompanying prospectus or registration statement of which the accompanying prospectus forms a part, has not been endorsed by us and should not be relied on by investors in deciding whether to purchase shares. The underwriters are not responsible for information contained in websites that they do not maintain.

Indemnification

We have agreed to indemnify the underwriters against liabilities under the Securities Act, or contribute to payments that the underwriters may be required to make in that respect.

LEGAL MATTERS

The validity of the shares of the common stock to be sold in this offering will be passed upon for us by Gary Epler, our Chief Regulatory Counsel. As of May 4, 2012, Mr. Epler beneficially owned approximately 5,658 shares of our common stock. Certain legal matters in connection with the offering will be passed upon for the underwriters by Vinson & Elkins L.L.P., New York, New York.

CAUTIONARY STATEMENT ABOUT FORWARD-LOOKING INFORMATION

This prospectus and the documents we incorporate by reference into this prospectus contain statements that constitute “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included or incorporated by reference into this prospectus, including, without limitation, statements regarding the financial position, business strategy and other plans and objectives for our future operations, are forward-looking statements.

These statements include declarations regarding our or our management’s beliefs and current expectations. In some cases, you can identify forward-looking statements by terminology such as “may,” “will,” “should,” “expects,” “plans,” “anticipates,” “believes,” “estimates,” “predicts,” “potential” or “continue” or the negative of such terms or other comparable terminology. These forward-looking statements are subject to inherent risks and uncertainties in predicting future results and conditions that could cause the actual results to differ materially from those projected in these forward-looking statements. Some, but not all, of the risks and uncertainties include those referred to in the section entitled *Risk Factors* and the following:

- our regulatory environment (including regulations relating to climate change, greenhouse gas emissions and other environmental matters), which could affect the rates we are able to charge, our authorized rate of return and our ability to recover costs in our rates;
- fluctuations in the supply of, demand for, and the prices of energy commodities and transmission capacity and our ability to recover energy commodity costs in our rates;

Table of Contents

- customers' preferred energy sources;
- severe storms and our ability to recover storm costs in our rates;
- our stranded electric generation and generation-related supply costs and our ability to recover stranded costs in our rates;
- declines in the valuation of capital markets, which could require us to make substantial cash contributions to cover our pension obligations, and our ability to recover pension obligation costs in our rates;
- general economic conditions, which could adversely affect (i) our customers and, consequently, the demand for our distribution services, (ii) the availability of credit and liquidity resources and (iii) certain of our counterparties' obligations (including those of our insurers and lenders);
- our ability to obtain debt or equity financing on acceptable terms;
- increases in interest rates, which could increase our interest expense;
- restrictive covenants contained in the terms of our and our subsidiaries' indebtedness, which restrict certain aspects of our business operations;
- variations in weather, which could decrease demand for our distribution services;
- long-term global climate change, which could adversely affect customer demand or cause extreme weather events that could disrupt our electric and natural gas distribution services;
- numerous hazards and operating risks relating to our electric and natural gas distribution activities, which could result in accidents and other operating risks and costs;
- catastrophic events;
- our ability to retain our existing customers and attract new customers;
- our energy brokering customers' performance under multi-year energy brokering contracts; and
- increased competition.

Many of these risks are beyond our control. You should assume that the information appearing in this prospectus and the documents incorporated by reference herein is accurate only as of their respective dates. We undertake no obligation to update any forward-looking statements to reflect events or circumstances after the date on which such statements are made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for us to predict all of these factors, nor can we assess the impact of any such factor on our business or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statements.

Our non-regulated operations are conducted through Usource L.L.C. (“Usource”). Usource provides competitive energy brokering and advisory services to a national client base of large commercial and industrial customers.

RISK FACTORS

Investing in our common stock involves risks. You should carefully consider the risks described in our filings with the SEC referred to in the section entitled *Where You Can Find More Information* and in the section entitled *Cautionary Statement About Forward-Looking Information*, as well as those included in any prospectus supplement hereto. For example, our Annual Report on Form 10-K for the year ended December 31, 2011 contains a discussion of significant risks in the section entitled *Risk Factors*, which could be relevant to your investment in our common stock. Subsequent filings with the SEC may contain amended and updated discussions of significant risks.

PLAN OF DISTRIBUTION

We may sell our common stock to one or more purchasers, through agents, to or through underwriters or dealers, or through a combination of any such methods of sale. The distribution of our common stock may be effected from time to time in one or more transactions at fixed prices, which may be changed, at market prices prevailing at the time of sale, at prices related to such prevailing market prices or at negotiated prices. The prospectus supplement will set forth the terms of the offering, including the names of any underwriters, dealers or agents, the purchase price of our common stock and the proceeds to us from such sale, any underwriting discounts and commissions or agency fees and other items constituting underwriters' or agents' compensation and any discounts or concessions allowed or paid to dealers or any securities exchange on which such securities may be listed. Any discounts or concessions allowed or paid to dealers may be changed from time to time.

Any discounts, concessions or commissions received by underwriters or agents and any profits on the resale of our common stock by them may be deemed to be underwriting discounts and commissions under the Securities Act of 1933, as amended. Unless otherwise set forth in the applicable prospectus supplement, the obligations of underwriters to purchase our offered common stock will be subject to certain conditions precedent, and such underwriters will be obligated to purchase all such common stock, if any is purchased. Unless otherwise indicated in the applicable prospectus supplement, any agent will be acting on a best efforts basis for the period of its appointment.

Pursuant to a requirement by the Financial Industry Regulatory Authority (the "FINRA"), the maximum commission or discount to be received by any FINRA member or independent broker/dealer may not be greater than eight percent (8%) of the gross proceeds received by us for the sale of any securities being registered pursuant to SEC Rule 415 under the Securities Act of 1933, as amended.

If at the time of any offering made under this prospectus a member of FINRA participating in the offering has a "conflict of interest" as defined in FINRA Rule 5121 ("Rule 5121"), that offering will be conducted in accordance with the relevant provisions of Rule 5121.

We may authorize underwriters, dealers or other persons acting as agents for us to solicit offers by certain institutions to purchase our common stock from us, pursuant to contracts providing for payment and delivery on a future date. Institutions with which such contracts may be made include commercial and savings banks, insurance companies, pension funds, investment companies, educational and charitable institutions and others, but in all cases such institutions must be approved by us. The obligations of any purchaser under any such contract will be subject to the conditions that the purchase of the offered common stock shall not at the time of delivery be prohibited under the laws of the jurisdiction to which such purchaser is subject. The underwriters and such other agents will not have any responsibility in respect of the validity or performance of such contracts.

In connection with the offering of our common stock, we may grant to the underwriters an option to purchase additional securities to cover over-allotments at the public offering price, with an additional underwriting commission, as may be set forth in the accompanying prospectus supplement. If we grant any over-allotment option, the terms of such over-allotment option will be set forth in the prospectus supplement for such common stock.

We may indemnify agents, underwriters and dealers against certain liabilities, including liabilities under the Securities Act of 1933, as amended. Our agents, underwriters and dealers, or their affiliates, may be customers of, engage in transactions with or perform services for us, in the ordinary course of business.
